

How to Connect to

Scm-Corp

SCM managed laptops: Any SCM laptop should just connect automatically if in range, for all staff, teacher, or student laptops. All resources such as Internet, Safari, printers and network drives are available. Please contact your local tech assistant or IT dept in case of problems.

Non-SCM Laptops: Due to security concerns about student information, viruses, and malware personal laptops **can not** connect to internal resources. Printers and safari will be unavailable. Please see the "scm-guest" documentation for wireless.

Non-Scm ipads: Please see the "scm-guest" documentation for wireless.

Scm Ipads: Connect to scm-corp, and use your current computer/email username and password. This will allow internet and itunes access.
